***The Prospects and Impact of
Alternative Energy Technologies***

Conversation:

Saturday, January 14, 2012

7:30 – 9:00 pm

Concord House, 1407 Chapala St., Santa Barbara

Peter Freisen, active in visualizing new environmental technologies, will discuss practical advances in solar energy technologies and their direct connection to global water supplies. Their shortage is predicted to be the worst environmental crisis of the 21st century. The potential social impact of failure to find resource alternatives will be discussed in this informal conversation.
